

Consult

Contemporary Art Collections

CAS Consultancy is the UK's leading agency for developing outstanding contemporary art collections for private and corporate clients. Whether seeking a feature artwork or looking to build an inspired collection from inception, our networks and long-standing reputation in the art world help you discover very special contemporary art treasures.

Corporate collections are in many ways a reflection of company identity and values to both the outside world and to its people. The advice we offer is directly responsive to the individual needs of our clients, drawing out the themes, interests and concerns that a company wants to express through contemporary art. We actively work to bring the collection to life for staff and clients through engagement and hospitality programmes that extend involvement with the art and communicate the vision in meaningful ways.

We also provide expert collection management services including re-hanging, cataloguing and labelling, framing advice, collection dispersal, insurance evaluations, condition reports and inventories.

CAS Consultancy—Collecting the Contemporary for Tomorrow
